School Name _____
School Address _____

School Phone No. _____

Grade and Subject Taught _____

Have you ever taught about archaeology, Kentucky prehistory, or the lifeways of past Kentuckians?

If you did, was it as a separate class, a unit within a larger subject, a brief reference or example? Was it linked to a particular season of the year or holiday?

How do you want to include archaeology/prehistory/culture history in your teaching? Within existing lesson plans? As a separate unit? Apply concepts to other subjects? Please explain.

What kinds of resources do you need to meet your teaching goals?

Thanks for joining the Kentucky Archaeological Survey's **Archaeology Education Network!!**
