Grants Strengthen the Intersection of Creativity and Urban Revitalization - Applications may be submitted throughout the year

Priority is given to projects that take root in economically distressed communities.

Kresge Foundation: Arts and Culture Program: Local Systems

The Kresge Foundation's Arts and Culture Program seeks to build strong, healthy cities nationwide by promoting the integration of arts and culture in community revitalization. The Local Systems focus area funds organizations that infuse creativity into comprehensive community development and urban planning practices. Support is provided for cross-sector and cross-disciplinary projects that embed arts, culture, and community-engaged design into municipal governments and departments and in other non-arts disciplines and sectors. Priority is given to projects that take root in economically distressed communities and ensure that residents with low incomes contribute to, engage in, benefit from, and are empowered by activities. Collaborations of multiple partners from different sectors (public/private) and disciplines (arts, health, environment, human services) are eligible to apply. Online applications may be submitted throughout the year.

Visit the Foundation's website to learn more about the Local Systems focus area.

Our trip to western KY included a meeting with the Mayor of Hazel, a small town full of Antique shops!

Our visit to Murray included attending city council meeting where director, Deana Wright presented the Murray Main St. annual report. The council was very interested and very engaged in looking at the report. Great job Deana.

The next morning we met with Murray Main Street board members and members of city council along with Mayor Rogers. We had great discussion and we are looking forward to 2019 in Murray. Lots of things are in the works. We were excited to have such great engagement from local leaders and our Main Street volunteers!

One additional treat was to see the updates at the Swaan Warehouse. You will recall our visit to this former warehouse at our 2017 fall meeting in the western region. It is amazing all that has been taking place and that is continuing to happen there. It is a wonderful adaptive reuse of a great building. We have been excited to watch the progress over the past few years and can't wait to see the completed project !

It was great to be able to share this project with fellow KHC staff, Tressa Brown to see this great tax credit project first hand.
